

What went well?

What should we keep doing?
What should we celebrate?
Where did we make progress?

What went poorly?

Where did we have problems?
What was frustrating to us or others?
What held us back?

Global Air

In almost all the countries worldwide, the two world wars provided a big boost for the growth of air transport.

They built a wind tunnel and then created various devices to measure the drag and lift on more than two hundred wing designs.

Airplanes, on the other hand, have the ability to soar over any obstacle.

Air travel is the riskiest mode of transport, since there can be considerable losses to goods,

On a pre-covid basis, air traffic doubles every 10 years

ensuring access to affordable clean household energy solutions for cooking, heating and lighting;

Conserve energy - at home, at work, everywhere. Look for the ENERGY STAR label when buying home or office equipment.

Renewable fuel and clean energy production.

The use of electric vehicles can also help reduce pollution generated by transportation.

connect India to the rest of the world and facilitate the movement of goods and people across borders

They facilitate international trade, investment, and cultural exchange, while also promoting regional integration and connecting India to the global economy.

Increasing its usage rates and popularity.

What ideas do you have?

What ideas do you have for future work together?
Where do you see opportunities to improve?
What has untapped potential?

How should we take action?

What do you believe we should do next?
What specific things should we change?
What should extend beyond this meeting?
